

EGOLF Harmonisation course

EN 1363-1, EN 1363-2 Fire resistance - general requirements, illustrated through EN 1364-1 (partitions)

There are many factors which may affect the result of a reaction to fire or resistance to fire test. Because of the very labour intensive nature of fire testing many of the factors are operator dependent. The training, experience and attitude of the operator are thus crucial to eliminate such variables that may, significantly affect the degree of uncertainty of measurement.

In order to reach common interpretations and to minimise the operator generated uncertainties, EGOLF are giving training courses in the various CEN standards related to reaction to fire and resistance to fire.

The aim of the training course on EN 1363-1 Fire resistance - general requirements, illustrated through EN 1364-1, is to explain the general principles and interpretations of the standards. During the course the following areas will be covered:

- Introduction to EN 1363-1, EN 1363-2 and EN 1364-1
- Planning and designing the test specimen
- Installation and verification of the test specimen
- Instrumentation
- Pre-test preparation
- Undertaking the test
- Evaluation against performance criteria
- Test report

The course includes practical lessons in using the instrumentation described in EN 1363-1 and EN 1363-2.

The content of the course will be illustrated by a full scale resistance to fire test according to EN 1364-1. The fire test will be used as a case to exemplify the problem areas that are addressed during the course.

The course is open for both EGOLF members and non EGOLF members.

Course presenters

Anders Drustrup, DBI.
Niall Rowan, Warrington Fire.

Cost

Cost for EGOLF members -
Euro 950.

Cost for Non EGOLF members
Euro 1,250.

EGOLF HARMONISATION COURSE EN 1363-1/2 AS EXEMPLIFIED BY EN 1364-1

Held at DBI 7-8. July 2010

Please find below a form to be completed before your attendance at the EGOLF harmonisation course referred above.

The course will start 7th July at 09:00 a.m. and end 8th July at 16:00 p.m.

Please complete all details and return it as soon as possible to DBI. You can either scan the completed form and e-mail it back to: ssi@dbi-net.dk or fax it on +45 36 34 90 05. If you fax the form to DBI, please mark it clearly attention Sanne Simonsen.

Once we have received your completed form, we will e-mail out the harmonisation course material for you to view in advance of the course. This will include:

- List of participants
- Provisional timetable for the course
(this may vary slightly according to the specimens we watch being tested)
- Presentation – Introduction to EGOLF harmonisation courses
- Presentation – EN 1363-1/2 as exemplified by EN 1364-1
- Course Material – EN 1363-1/2 as exemplified by EN 1364-1
- EGOLF Technical Recommendations 03, 09, 16, 20, 23, 36, 37 & 39
- Course evaluation questionnaire.

We look forward to seeing you at DBI on 7th July.

Send this course confirmation form
at e-mail: ssi@dbi-net.dk

or

by fax on +45 36 34 90 01
Attention: Sanne Simonsen

Cost
Euro 950 for EGOLF members
Euro 1,250 for Non EGOLF members.

Pre payment will be required.
